

TIMEKEEPING SOLUTIONS

Quality, Efficiency, Simplicity

2484 Features

- Time displayed in six-digit format [HH:MM:ss]
- Date displayed in Day of the Week-Month-Date format
- Text Messaging from TII/XL Systems
- Elapsed and count down Timer
- Single or double-sided for mounting on wall or ceiling
- Synchronization with Master Clock using digital protocol
- Anti-reflective front cover for optimal readability over a wide viewing angle
- Easily installed as the clock face snaps into the surface or flush-mount housing

Digital Calendar Clock

The 2484 Digital Calendar Clock simultaneously displays both the current time and date. The time is displayed in six digits (HH:MM:ss). Hours and minutes are displayed larger to easily distinguish them from seconds. The date is displayed in plain text, showing the day of the week, followed by the month and date.

Message Display

Evacuate Immediately

When used with the Telecor II/XL Communications System, the 2484 can also display text messages, making it ideal for visual alerts. Messages are displayed on the dot matrix portion of the clock and can be fixed, flashing, or up to 64 scrolling characters. When the message ends, the Dot Matrix Display returns to the Date Display.
