

DWConnect ™

FOR *eSeries*™

Provides Quick Response to Critical Situations

- Designed for single school applications
- Quickly informs staff and administration of emergency events
- Send SMS and email alerts to mobile phones, tablets and computers
- Customizable alert groups, messages, and recipients

DWConnect LT is the more economical version of DWConnect. Its scaled down application to 100 users makes it ideal for single school utilization.

Administrative staff are able to easily distribute notifications to mobile devices quickly and effectively to staff and facility emergency teams.

Alerts can be activated from PC emergency icons, emergency call stations, dial access codes on consoles and PBX extensions. In addition, in the event of a fault on the communications system, DWConnect LT can send notifications to maintenance staff alerting them of the fault.
