

## Provides Quick Response to Critical Situations

- Wireless notification to pocket devices
- Auto delivery of alerts to multiple devices
- Early intervention & quicker response times
- Real-time information about a single school or entire district
- Integrates with District Wide Paging

DWConnect™ automatically sends text messages, directly to any mobile or smart phone, whenever an emergency procedure, such as a lock down is initiated in a school. Messages can be sent by text, email and computer screen pop-ups to a predefined group of people responsible for dealing with critical situations.

DWConnect™ software resides on a dedicated server located on a School District's LAN/WAN infrastructure. Local computers and wireless mobility devices are accessed by the server providing timely notifications to subscribers at the time of the event.
