

# TIMEKEEPING SOLUTIONS

Quality, Efficiency, Simplicity

## 2427 Elapsed Timer

The 2427 Elapsed Timer provides stopwatch functionality, displaying the elapsed time in a six-digit display, indicating the time in hours, minutes, and seconds. Hours and minutes are displayed larger to easily distinguish them from seconds. When not operating as an elapsed timer, the 2427 defaults back to displaying the current time when connected to a Master Clock.

Elapsed time functions include the ability to count upwards from zero to 24 hours, as well as counting down to zero from a specific value. Functions are set from a remote Timer Button Panel.

## Features

- Elapsed time displayed in six-digit format [HH:MM:ss]
- Counting upwards from zero up to 24 hours
- Counting downwards from a specified value
- When counting down, a built-in buzzer will sound at 00:00:00
- Single or double-sided for mounting on wall or ceiling
- Synchronization with Master Clock using digital protocol
- Anti-reflective front cover for optimal readability over a wide viewing angle
- Easily installed as the clock face snaps into the surface or flush-mount housing
