

Improve Your Audio and Visual Communication with Telecor's New All-In-One Display

Telecor's new all-in-one display combines a speaker, strobe, message display and clock/calendar into one, architecturally pleasing device. The network-based display brings all of these features into one fixture reducing overall cost and installation labor for your facility while enhancing communication.

Eyes and ears will be drawn to intercom calls, live paging announcements and emergency messages with crystal-clear HD audio, scrolling text and configurable flash-patterned white, red, green, or blue strobe colors that can fit the corresponding operation.

The display is fully supervised and monitored for network connectivity, call destination, and call station connectivity, which is consistent with the NEMA SB-40 standard for communication systems.

The display uses Power-Over-Ethernet technology with a Just-Plug-It-In™ design and a decentralized network structure to ensure easy wiring and simplified network planning – meaning no network configuration or administration and no IP address or DHCP server requirements. Once you plug this all-in-one display into the LAN with a valid time signal, it is immediately functional.

- ✓ True digital network endpoint solution
- ✓ Displays Date in English, French or Spanish
- ✓ Built-in LED Strobe
- ✓ Variable Strobe Flash Rates
- ✓ Selectable Strobe Colors
- ✓ Provides Two-Way Talkback Communication
- ✓ No Head-End, Central Server or Controller
- ✓ Recessed and Surface Models
- ✓ Fully Supervised and Monitored for network connectivity
- ✓ Consistent with the NEMA SB-40
- ✓ Extremely Low-Latency
- ✓ Crystal-Clear HD Audio Speech Quality
- ✓ Just-Plug-It-In Design
