

eSeries™ eLog Black Box

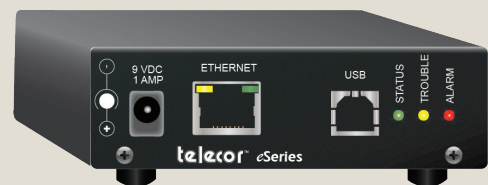

KNOW ALL AND SEE ALL

Know and see all events on your eSeries network with the eSeries eLog. Featuring our Just-Plug-It-In™ design, the Black Box simply connects via Ethernet to the eSeries network to log and record all eSeries network activity. It isolates the eSeries LAN from the computer LAN providing an additional layer of security.

Advantages:

- ✓ Logs and records eSeries System activity
- ✓ Real Time Clock synchronizes eClocks on LAN
- ✓ Station and system trouble (fault) indicator
- ✓ Supports eSeries network fault monitoring
- ✓ Features Just Plug It In!™ Design
- ✓ Connects to PC via USB
- ✓ Connects to network via Ethernet
- ✓ Requires no IP address, DHCP server, subnet, or mask configuration

At Telecor, we not only make the best in Public Address - but our eSeries Solution includes the ability to watch all of your facility's PA system events 24/7 - it's like having your own Black Box recording device.
