

ePanic

Mobile duress
at your fingertips

- ✓ Wireless Personal Panic Buttons
- ✓ Dynamic Visual Mapping
- ✓ No Recurring Annual Fees

Integrated Public Address & Mobile Duress

With the push of a button, Telecor's ePanic Pendant initiates a call for support from anywhere on the premises.

The solution uses receivers that pair to eSeries public address speakers which provides precise alert location. Once the alert is received at the command center, two-way voice communication is established.

Dynamic User Interface

The Visual Console User Interface receives the alert and displays the location on a mapped floor plan. Clicking on the Alarm Touchpoint instantly establishes voice communication with the location.

The interactive GUI allows incident management including lockdown, broadcast of announcements, and text/email messages on-site and off-site to First Responders.

Integration with the facility's IP Camera System provides the GUI with live view video streams of the alarm location.

In the USA
